How can Minder help your business?

How can Minder help your business?

Minder Global Safety Platform provides Security and Protection of your critical assets by connecting mobile technologies to the Security Operations of your business which allows you to manage personal safety and mitigate operational risk.

Minder is built on cloud technology and delivers two-way communication so that Security Personnel can be proactive and safely manage Remote workers and colleagues who work away from company headquarters.

Minder combines web and mobile technologies with the latest IoT innovation into one platform to deliver:

- **Personal Safety**
- **Asset Tracking**
- **Executive Travel Management**
- **Security & Process Automation**
- **Lone Worker Management**

Today's Problem – Protecting a Remote Workforce

Organisations face a number of risk issues with employees and assets moving between different geographic locations.

- **Outside HQ** – 3 in 5 (60%) of today's workforce work from home, out of the office or on the road.
- **Legal Obligation of Employers** - Employees working alone should be at no greater risk than employees working at company headquarters. It is an employer's duty to assess risks to employees and take steps to avoid or control the risks.
- **Corporate Manslaughter** – In the USA, the Corporate Manslaughter and Corporate Homicide Act 2007 clarifies the criminal liabilities of companies, including large organizations where serious failures in the management of health and safety result in a fatality.
- **Employee Safety and Business Continuity** – In the event of a serious injury or death in service negligence claims may be made if it is deemed that the employer did not take necessary risk assessment or implement systems for responding to emergency events from workers carrying out duties in dangerous or volatile situations.

Lone workers

Lone workers may be exposed to hazards such as violence and aggression (including physical and verbal abuse) and difficult work environments and may be at greater risk in the event of an emergency or if involved in a work related accident.

Lone workers can be found amongst those who;

- Work separately from others, e.g. a technician working alone in a laboratory providing an out of hours service, a maintenance person working in an isolated area;
- Work away from their fixed base e.g. a security person on patrol, a nurse on escort duty;
- Work in the community e.g. a psychiatric nurse visiting community homes;
- Work outside normal hours e.g. GP on call;
- Are the only person on the premises, e.g. a receptionist alone in a clinic;
- Visit people in their homes, e.g. social workers, doctors, home helps, public health nurses.

Today's Remote Solution

Minder mitigates risk by connecting remote workers to the security control room or Alarm Receiving Center (ARC). This provides a risk overview of personal safety which ensures that in the event of a dangerous incident that Standard Operating Procedures (SOP's) are carried out which will lead to lives being saved and major injuries being avoided or managed.

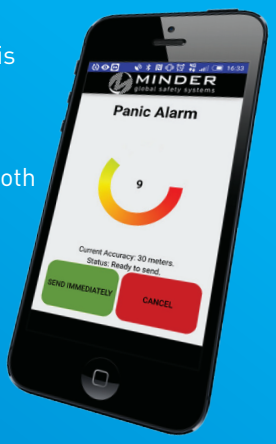
Minder is a Global IoT platform where safety data is:

- **Collected** using Mobile Devices, Security Sensors, Wearables and Communication Feeds.
- **Transmitted** using LAN/WAN, Wi-Fi, GSM, SMS & Bluetooth connection services.
- **Stored** and processed using our secure Cloud Services Infrastructure.
- **Presented** using Analytics, Reporting and Dashboards.

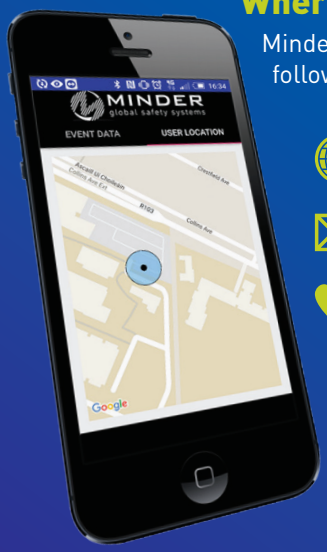
What is Unique about Minder?

- **Unrivalled Lone Worker features** – Employees can be managed centrally by the administrator but can also notify supervisors that a potentially dangerous job is in progress. Accelerometer variables such as movement, velocity, fall, heart rate can all be monitored to send health alerts to the Minder platform.
- **Easy Provisioning** - Minder is provisioned in the cloud so there is no costly infrastructure or server setup costs for you the customer.
- **Flexibility** - Minder technology does not stick to one device or set of features. Any supported technologies can be connected to Minder Platform. The Minder team is vastly experienced in custom design and connecting distributed systems.

Minder Global Communications Platform is offered in three categories:



- **Minder Professional**
  - Personal Safety – Including Bluetooth Watch or Neck Lanyard.
  - Lone worker systems – Safe and Well, Dial Out features
  - Tracking (On Demand)
  - Email Support
- **Minder Enterprise**
  - Personal Safety – Including Bluetooth Watch or Neck Lanyard..
  - Lone worker systems – Safe and Well, Dial Out features
  - Tracking Pack (2 Months of Data)
  - Reporting
  - Phone Support
- **Minder Dedicated**
  - Personal Safety – Including Bluetooth Watch or Neck Lanyard.
  - Smart Watch device
  - Lone worker systems – Safe and Well, Dial Out features
  - Tracking Pack (6 Months of Data)
  - Custom Reporting
  - API to connect applications and devices to Minder
  - API to connect Minder components into other applications
  - Phone Support



Where can I get Minder?

Minder can be purchased through the following channels:
