MINDER Global Safety Systems

Product Data Sheet

Powered by Cruatech:

Minder Platform is a cloud based solution that connects Mobile technologies to the Security Operations of a business to Manage Personal Safety and Mitigate Operational Risk.

Minder Safety platform delivers two-way communication so that operations teams can be proactive and safely manage Remote workers and colleagues who work away from company headquarters.

Minder Platform Monitors:

- **Personal Safety**
- **Lone Worker Management**
- **Tracking**
- **Automation - Visitor Management, Barrier Control, Mobile Access, CCTV.**
- **Executive Travel**

Site Administrators have full access to the Minder global safety systems application and all its features. They can also create and add new users to the account. Different user profiles can be created on the site and assigned to different users to both restrict and enable users to have access to the different features of the application.

Key Minder Platform features

- 1. Safety Alarms** – Minder provides the capacity to send Panic, Video, Photo, Audio and Custom alarms to the Security Control Room through the Minder Web Application.
- 2. Tracking** – Users can be tracked all over the globe during custom and predefined GPS intervals. Tracking outdoor accuracy is 8m using Satellite Positioning and Assisted GPS.
- 3. Lone Worker Management** – Users or groups can be tracked and sent health check requests at a regular interval which if not acknowledged by the user will create an event in Minder. Users can also create a custom job for a set time interval, during this time interval the user will be sent health check requests at a regular interval which if not acknowledged by the user will create an event in the system
- 4. Panic Triggering** – Panic alarms can be triggered using a number of wearable devices. Events triggered from a V.BTTN device create a Panic Alarm Man-Down event to Minder Platform.
- 5. Communications** – Mobile device users can receive custom messages sent by the operators from Minder Platform communications panel.
- 6. Event Forwarding** – Mobile users can have events forwarded to them from the Minder Site

- 7. Personal Panel** – Users can install and send Panic and Custom Alarms from their PC to the Minder site through the Personal Tray Application. This is particularly useful for personnel working or deployed in public areas.
