# PLAI Agent Version 1.0.2.4 Release Notes

January 2019

Please read this file before installing the product.

## PLAI Market Information

---

This Release Note file provides important information for the PLAI Agent software. (In case of discrepancy, the information in this document supersedes the information in any document referenced herein.)

The PLAI Agent system provides information exchange between the individual PACS and the single authoritative source. The PLAI Agent's main function is to ensure the logical and physical access privileges associated with an employee's role are always synchronized. This enables a company to ensure a person is physically present before permitting access to databases or applications. In addition, the PLAI agent enables automated inter-PACS interoperability for the first time. Users can reduce multiple access cards as the inter-PACS interoperability automates the process of enabling an access card associated in one vendor's PACS to be used at entry points associated with a different PACS system provided the card readers are the same.

The PLAI Agent acts as a form of information broker between the individual PACS and the authoritative source.

## Key Feature #1 PLAI Agent User Interface

---

*The PLAI agent is delivered in a web front end Windows IIS application using the latest responsive design. The PLAI agent User interface allows easy connectivity of LDAP identity sources. PACS and Biometrics connectivity is also extremely easy which facilitates propagation of identities to all connected systems.*

PLAI Agent also covers following features

- PACS credentials synchronisation
- Cardholders management (Get/Create/Delete/Update)
- Credentials management (Get/Create/Delete/Update)
- Groups and Roles management (Get/Create/Delete/Update)
- Events streaming (Get).

## Key Features #2 PLAI Dashboard

---

*Cruatech PLAI Agent also offers a credential dashboard and synchronization viewer for viewing any matched or unmatched users, and the number of successfully propagated users.*

## Contents of Installation

---

The installation contains the following files:

- Cruatech.PLAI.Agent.exe– *Installation program for the PLAI Agent*
- PLAI Agent User Guide.pdf – *Agent Guide*
- PLAI Agent Release Notes.pdf– *PLAI Agent Version 1.0.2.4 Release Notes*

## Requirements

---

The PLAI Agent product requires the following software versions:

- Microsoft Windows Server 2008 R2/2012 R2/2016
- SQL server 2008 R2/2012 R2/2014/2016
- Microsoft Internet Information Services (IIS)
- Microsoft Framework 4.6.1

## Limitations

---

The PLAI Agent product has the following limitations:

- English only
- Support only Reliable GET event streaming method

## Installation

---

See the *PLAI Agent User Guide*.

## Features

---

This PLAI Agent now has the following features and enhancements:

- PACS credentials synchronisation
- Cardholders management (Get/Create/Delete/Update)
- Credentials management (Get/Create/Delete/Update)
- Personnel Matching configurable for C-CURE 9000 and Princeton Identity systems
- Groups and Roles management (Get/Create/Delete/Update)
- Events streaming (Get)

## Enhancements

*This section describes enhancements delivered as part of PLAI product development and roadmap strategy.*
